SUSTAINABLE BLISTER PACK REPLACEMENT

Curbside Recyclable

**Runs on Existing Blister
Sealing Equipment**

**In-House Custom Design,
Printing, & Production**

Sustainable Packaging

Paperform is made from **renewable, paper-based materials**, designed to be curbside recyclable (pending How2Recycle pre-qualification), ensuring easy disposal for consumers while minimizing environmental impact by avoiding toxic chemicals, microplastics, and harm to wildlife or ecosystems if it enters the environment.

Equipment Compatibility

This solution seamlessly **runs on existing blister sealing and thermoforming equipment**, eliminating the need for expensive machinery upgrades, while its flexible design options accommodate a wide range of product sizes and packaging styles.

Production & Design

Atlantic's in-house manufacturing capabilities include forming machines supported by an established global supply chain and trusted by billion-dollar brands across industries for end-to-end printing, die cutting, forming, and package testing.

PAPER FORM

SEAL OPTIONS

1. Face Seal

- Cost-Effective for Lower-Price Products
- Printing on Both Sides of Card
- Reduction in Material Usage and Costs by Eliminating Back Card
- Easy Product Access, Ideal for Low-Risk Retail Environment

2. Perimeter Seal

- Expanded Outer-Edge Messaging Space
- Eliminating Back Card Reduces Material Usage and Costs
- Consolidation of Packaging for Products of Similar Size
- Design Allows for Hanging on Hooks or Stacking With Increased Durability and Strength

3. Trap Seal

- Premium Appearance for High-Price Products
- Double-Layer Design for Strength and Durability When Hanging on Hooks or Stacking
- Easy-Open Back Card for Frustration-Free Access
- Ideal for Club Stores
