ATLANTIC CARIBBEAN PACKAGING

INNOVATIVE PACKAGING
SOLUTIONS **YOU CAN TRUST.**

ATLANTIC CARIBBEAN PACKAGING

For over 25 years, Atlantic Caribbean Packaging has set the standard in industrial packaging, advanced engineering, technical service, and custom-converted solutions — always driven by the evolving needs of our customers. Our commitment to service, performance, and integrity is the foundation of everything we do.

In response to the growing demand for safety, compliance, and performance validation, we have expanded our capabilities to include microbiological analysis, food safe packaging, and ISTA certified testing. The result is a more comprehensive and fully integrated solution for the partners who rely on us.

Equipment & Materials

Engineering & Technical Service

Printing & Converting

Consulting & Innovation

CERTIFICATIONS

Quality & Sustainability Certifications:

- ISO 9001:2015 Certification – Quality Management System
- ISO/IEC 17025 Certification – Microbiological Laboratory
- EcoVadis Silver Medal
- SMETA Audited
- G7® Expert Certification – Color Quality
- FSC® Chain of Custody Certification
- SEDEX – Supplier Ethical Data Exchange
- OEA Level 1 – Authorized Economic Operator
- ODAC – Water Testing Accreditation

Food Safety Certifications:

- BRC for Flexible Packaging
- HACCP Certification
- GMP Certification

WAREHOUSING & DISTRIBUTION

Tailored supply programs and performance materials designed to maximize efficiency, cut costs, and protect what matters.

International logistics & extensive storage

Just-in-time delivery & vendor-managed inventory

Dedicated trucks & excellent ocean freight partnerships

Consulting & Engineering Support For:

- Stretch Wrapping and Hooding Systems
- Shrink, Overwrap, and Bagging Programs
- Case, Tray, Tape, and Adhesive Operations
- Marking, Coding, and Labeling Technologies
- Strapping and Banding Solutions
- Conveyors, Robotics, and Material Handling
- Pallet Protection: Sheeting, Corner Boards, Caps, Shrouds
- Product Protection: Void Fill, Cushioning, Inserts
- Retail and E-Commerce Packaging: Mailers, Coolers, Rubber Bands, Fasteners/Barbs
- Direct Contact: Rigids, Blisters, Preforms, Lidding Films
- Food Service: Containers, Cutlery, Napkins
- Site Operations: Metal Detectors, PPE, Janitorial & Sanitation

CUSTOM END-OF-LINE AUTOMATION

Our team of engineers integrate and implement custom equipment installations tailored to your unique needs.

From fully integrated end-of-line automation systems to manual applicators, we're here to provide your operation with the ideal machine that dispenses protection for your product and brand through every step of the supply chain.

Technical Service & Parts:

We are committed to delivering industry-leading equipment service and support to maximize efficiency and minimize downtime for our partners.

- Expert technicians
- Installation & operator training
- On-demand service
- Preventative maintenance
- Comprehensive parts inventory with dedicated support team

PACKAGING MANUFACTURING

Paperboard:

- **Products** - Cartons, Inserts, Backing Cards, Booklets, Instruction Manuals, Cups
- **Equipment** - Printers, Die-cutters, Sheeters, Coating & Foiling Systems, Folder Gluers, Windowing Equipment, Cup Manufacturing Equipment
- Custom Materials, Printing, Coating, Varnishing, Finishing

Flexibles:

- **Products** - Films, Labels, Ribbons, Shrink Sleeves, Stickers, Pouches, Tapes
- **Equipment** - 52" Thin-Gauge Flexo Press, Solventless Laminator, High-Speed Pouch Machine, Slitting Machine, Doctor Machine (Slitting & Rewinding), Centerfold Machine
- Custom Materials, Printing, Coating, Laminating

Corner Board Converting:

- **Dimensions** -
 - Wings: 1" x 1" min - 4" x 4" max
 - Thickness: 1" x 1" min - 4" x 4" max
 - Length: 275" max
- **Customization** - 4-color print, perforation (minimum 4"), die cutting
- **Paperboard Options** - Kraft (brown) or SBS (white)
- Moisture resistant coatings for produce applications
- FSC® certified materials & curbside-recyclable options

Pre-Stretch Converting:

Slitting and rewinding stretch film into smaller sizes for hand film, requiring less force to apply.

- **Equipment** - Slitting & Rewinding Equipment, Core Cutters

Core Manufacturing & Core Cutting:

Winding paperboard into cores and tubes, then slicing cores into precise sizes for material application.

- **Equipment** - Core Cutters, Core Winders (1-color printing)

Contract Packaging & Kitting Assembly:

We apply packaging in-house to support seasonal or year-round operations and create ready-to-ship packaging kits by combining materials in-house to streamline your end of line.

Key Advantages:

- In-house application by experienced operators
- Use of our manufactured or sourced materials for cost control
- Flexible capacity for seasonal spikes or steady runs
- Global sourcing for supply chain stability
- Ability to scale with customer growth & program needs
- Trusted partner to Fortune 500 companies
- Specializing in making, filling, & packaging non-food grade liquids
- Member of Contract Packaging Manufacturing Association
- Save time and costs associated with packaging assembly
- Consolidate multiple SKUs into one shipment

Packaging Solution Center:

Located in Charlotte, North Carolina

Our scientific, data-driven approach to packaging allows us to refine, standardize, and validate your packaging for transit to minimize product damage, environmental impact, and packaging spend.

- ISTA-Certified Testing Facility
- State-of-the-Art Stretch Film Property Test Equipment from ESTL
- TruMotion Multi-Degree of Freedom Vibration Table
- Horizontal Impact Test Sled
- Compression Testing
- Drop Testing
- Environmental Testing Chambers
- Automation Equipment Demonstrations
- Design Team & CAD Tables
- Stretch Film Recycling Equipment

International Safe Transit Association Testing (ISTA):

We replicate real world transit conditions using state of the art testing equipment to ensure every packaging solution delivers maximum protection with minimal material usage and cost. Through ISTA certified testing protocols, we validate packaging configurations for both palletized loads and individual parcels, giving our partners confidence that their products will move through the supply chain safely, efficiently, and without damage.

MICROBIOLOGICAL LABORATORY

Atlantic's Lab Service Division has been designed by experts to meet the needs of our customers, ensuring clean, safe products and real-time results.

Physical-chemical analysis in water

Liquid chromatography

Gas chromatography

- **Water Analysis** – Heterotrophic Plate Count/ Mesophilic Aerobic Count, Total Coliforms, Fecal Coliforms, E. coli, Pseudomonas Aeruginosa, Enterococcus faecalis, Legionella spp.
- **Food & Beverage Analysis** – Total Bacteria Count, Total Mold and Yeast Count, Total Coliforms, Fecal Coliforms, E. coli, Bacillus Cereus, Staphylococcus Aureus, Salmonella spp., Listeria spp.
- **Environmental Monitoring** – Pathogen Detection, Total Coliforms, Total Mesophilic Aerobic Count, Total Bacteria Count, Fungal and Yeast Count
- **Cosmetics Analysis** – Microbiological Analysis of Raw Materials, Intermediate Products, and Finished Products; Total Mold and Yeast Count; Total Bacteria Count; Total Viable Organism Count; Pathogen Detection
- **Physical-Chemical Analysis** – pH; Alkalinity; Total, Free, and Residual Chlorine; Chlorides; Neutral, Anionic, and Cationic; Surfactants; Phenolic compounds; Sulfates; Hardness; Metals; BOD/DQO; Inter Alia

OUR COMMITMENT

Atlantic is the first packaging company in North America to earn both a CDP “A” score for Climate and approval of a net-zero Science Based Target.

As the first in our industry to set an SBTI-approved net-zero emissions target, we are committed to reaching zero emissions by 2046. In 2023, Atlantic was the only packaging company in North America to receive an A rating on CDP’s Climate Change Questionnaire, followed by a B rating in 2025, reflecting our continued commitment to transparency and disclosure. By reducing our own emissions and investing in technology and people, we help our partners reduce theirs and achieve meaningful progress toward their sustainability goals.

SUSTAINABILITY PROGRAMS

MUST Stretch Film Management | Load Containment & Monitoring

A cutting-edge industrial IoT monitoring platform trusted by Fortune 100 brands to standardize and optimize the stretch wrapping process. Backed by a team of over 50 specialists, MUST empowers clients to monitor their wrappers, reduce costs, minimize product damage, and lessen environmental impact.

LoadLogic | Optimized Stretch Wrapping for Variable Pallet Configurations

Sensors detect the dimensions and weights of variably sized pallets of products and automatically selects the appropriate stretch wrap pattern from nine preprogrammed, customized settings to ensure cost savings, material reduction, and containment consistency.

Canopy™ | Curbside Recyclable Paper Bundling

A curbside-recyclable paper bundling system that replaces traditional PE shrink film and over-boxes with extensible kraft paper wrap, helping manufacturers eliminate single-use plastic, right-size their packaging material, and meet sustainability goals – without sacrificing supply chain durability, high-speed automated application, or branded print capabilities.

Guardian Taping System | Reduce Material Waste & Save Money

The retrofittable, automated tape head system that uses innovative wipe-down pressure and Folded Edge® Technology to consistently apply the optimal amount of premium tape to every case – creating a tamper-evident, knife-free seal while reducing material usage, downtime, and costs.

Layershield | Sustainable Pallet Sheets

A sustainable packaging program featuring 100% recycled-fiber, curbside-recyclable paperboard sheets – compatible with automatic palletizers and available in custom dimensions – replacing corrugates, gypsum, honeycombs, and plastic across pallet lining, slip sheet, top cover, and tier sheet applications while reducing cost, weight, and storage footprint.

Paperform | Sustainable Blister Pack Replacement

A thermoformed paperboard replacement for plastic blister packs – compatible with existing equipment and featuring in-house custom printing and structural design – delivering a premium, eco-friendly alternative with no costly machinery upgrades required.

Fishbone | Sustainable Paperboard Beverage Carriers for Cans & Bottles

An alternative to cartons, rings, and caps, these paperboard beverage carriers for cans and bottles come with a water-based, moisture-resistant coating, custom printing for branding or promotions, and equipment options from handheld applicators to high-speed automated lines. alternative with no costly machinery upgrades required.

FibreStrap | Sustainable Cable Ties

The world's first fiber-based zip tie – made from certified Scandinavian wood fiber for outstanding tensile strength – FibreStrap is a sustainable replacement for traditional plastic cable ties, designed to bundle and secure virtually any product and integrate seamlessly into any packaging application.

Sustainable E-Commerce Solutions | Mailers, Garment Bags, & Automation

A comprehensive suite of sustainable e-commerce packaging solutions – including fiber-based mailers and protective void fill, cushioning, and wrapping – paired with automation options ranging from semi-automatic to fully inline high-speed systems, offering e-commerce businesses a turnkey transition away from single-use plastic mailers, bubble cushioning, and air pillows.

Sway Polybags | Flexible Films Made with Seaweed

This polybag alternative is made with a planet-replenishing resource: seaweed! Sway films are durable, protective, lightweight, and designed to protect goods in transit from your fulfillment centers to your customers.
